| IMMACULATE CONCEPTION HIGH SCHOOL DEPARTMENT OF MATHEMATICS CHRISTMAS TERM PLAN: September 4, 2023- December 19, 2023 |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: |
| NAMES OF TEACHERS: Ms Pryce, Ms Parker, Ms Bogle, Ms Dudley, Mrs Lynch, Mr McCalla |  |  |  |  |
| GRADE: 9 |  |  | TERM WEIGHTING: <br> Test $-60 \%$ <br> Coursework - 40\% | Assessments: 2 Six Weekly Tests <br> Course work: <br> Graded Homework, Online Quiz/Test, Class Quiz |
| TERM : I |  |  |  |  |
| WEEK | PERIOD | TOPICS | OBJECTIVE : Students should be able to: | ASSESSMENT |
|  | Sept 4-8 | Orientation Week | Introduction <br> Review of grade 8 exam |  |

| 1-2 | $\begin{aligned} & \text { Sep } 11- \\ & 22 \end{aligned}$ | Consumer Arithmetic II | Students should be able to: <br> 1. Solve problems involving <br> - Rates <br> - Utility Bills: Light, Water, telephone <br> - Invoices and shopping bills | Course Work |
| :---: | :---: | :---: | :---: | :---: |
| 3 | $\begin{aligned} & \text { Sept } 25- \\ & 29 \end{aligned}$ | Ratio and Proportion | Students should be able to: <br> 1. Review ratio (simplifying, sharing, calculating missing quantity) <br> 2. Use map ratio to calculate the actual distance between two places given their distance apart on a map <br> 3. Solve problems involving direct or indirect proportion | Course Work |
| 4-5 | Oct 2-13 | Relations/ Mappings and Graphs | Students should be able to: <br> 1. Recognize a relation <br> 2. Describe a relation as a set of ordered pairs <br> 3. Use an arrow diagram to show a relation. <br> 4. Use Cartesian graphs to show a relation. <br> 5. Identify relations which are mapping/ functions. <br> 6. Define a mapping(function) as many to one or one to one relation <br> 7. Construct table for given relations example $\mathrm{x} \rightarrow \mathrm{x} 2+4$ |  |

| 6 | Oct 13-17 | MID TERM |  |  |
| :---: | :---: | :---: | :---: | :---: |
| 7 | Oct 23-27 | SIX WEEKUY TEST |  |  |
| 8-9 | Oct 30- <br> Nov 3, <br> Nov 6-10 | Construction <br> Angles and Triangles | Students should be able to: <br> 1. Construct with compasses only $60^{\circ}, 30^{\circ}, 45^{\circ}, 90^{\circ}, 120^{\circ}$ etc <br> 2. Construct the perpendicular bisector of a given line <br> 3. Construct triangles with compasses and without the aid of a protractor when: <br> - The measurements of three sides are given <br> - The measurements of one side and two angles are given <br> - The measurements of two sides and an angle are given |  |
| 10-11 | $\begin{aligned} & \text { Nov } 13 \text { - } \\ & 24 \end{aligned}$ | Transformatio n | Students should be able to: <br> 1. <br> a) Define a translation <br> b) Translate a point/ figure using coordinates <br> c) State the relationship between figure and image <br> d) Identify coordinates of image <br> e) Identify translation vector given a figure and its image | Course Work |

|  |  | Transformatio n | ii) <br> a) Define reflection <br> b) Reflect shape in given lines e.g. $x$ axis, $x=2$ etc <br> c) State the relationship between figure and image <br> d) Identify lines of reflection figure and its image <br> iii) <br> a) Define a glide reflection <br> b) Carry out and locate the image of a point/ figure under a glide reflection <br> c) State the relationship between figure and image <br> d) Find the glide axis given the figure and its image <br> 2. Identify each transformation given figure and image | Course Work |
| :---: | :---: | :---: | :---: | :---: |
| 12 | Nov 27 Dec 1 | Probability | Students should be able to: <br> 1. Give reasons for probability theory <br> 2. Use diagrams to represent the outcome of ideal experiments. <br> 3. Determine the experimental and theoretical probability simple events. <br> 4. State the formula for the probability of a successful event. <br> 5. Identify absolutely impossible and absolutely certain events and their probability. <br> 6. Give probability of events with or without replacement. |  |

| 13 | Dec 4-8 | SIX WEEKLY TEST |  |  |
| :---: | :---: | :---: | :---: | :---: |
| 14 | $\begin{aligned} & \text { Dec } 11 \text { - } \\ & 15 \end{aligned}$ | Probability | Students should be able to: <br> 7. Determine the probability of independent, mutually exclusive and dependent outcomes. |  |
