| IMMACULATE CONCEPTION HIGH SCHOOL DEPARTMENT OF MATHEMATICS CHRISTMAS TERM PLAN:- September 4, 2023 to December 19, 2023 ( 15 weeks) |  |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: |
| NAMES OF TEACHERS: Ms Thompson, Ms Mossop, Ms. Parker, Ms Pryce, Ms Dudley |  |  |  |  |  |
| GRADE: 10 |  |  | $\begin{aligned} & \text { TERM WEIGHTING: } \\ & \text { Test - 60\% } \\ & \text { Coursework - 40\% } \end{aligned}$ | Assessments: 2 Six Weekly Tests <br> 4 Course work: Graded Homework, Online Qu | Class Quiz , Project |
| TERM : I |  |  | OBJECTIVE : Students should be able to: |  |  |
| WEEK | PERIOD | TOPICS |  |  | ASSESSMENT |
| 1 | Sept 4-8 | ORIENTATION AND DIAGNOSTIC TESTS |  |  |  |
| 2-4 | Sept 11 - 29 <br> (3 weeks) | Statistics II (review Statistics I first) | 1. Construct a simple frequency table for a given set of data <br> 2. Determine measures of central frequency from a table <br> 3. Draw a histogram and a frequency polygon of data represented in a simple frequency table] <br> 4. Construct a group frequency table from a set of data <br> 5. Given class size, determine class interval, limit, mid-point and upper/lower boundaries for a given set of grouped data <br> 6. Draw histogram and frequency polygon given a group data <br> 7. Determine the modal class and median from a set of grouped data <br> 8. Use the mid-point of the class interval to estimate the mean of data presented in group frequency table |  |  |
| 5-6 | Oct 2-13 <br> (2 weeks) | Trigonometry I | 1. Use simple trigono world: <br> - Heights an <br> - Angles of el <br> - Bearings <br> 2. Apply the sine and | c ratios to solve problems based on measurements in physical <br> ances <br> on depression <br> e rules to the solution of non right-angled triangles. | Course Work |

| 7 | Oct 16-18 | MID TERM |  |  |
| :---: | :---: | :---: | :---: | :---: |
| 7 | Oct 19-20 | Trigonometry I (Cont'd) | 1. Use simple trigonometric ratios to solve problems based on problems in the physical world: <br> - Heights and distances <br> - Angles of elevation and depression <br> - Bearings <br> 2. Apply the sine and cosine rules to non-right-angled triangles |  |
| 8 | Oct 23-27 | SIX WEEKLY TEST |  |  |
| 9-10 | $\begin{aligned} & \text { Oct } 30-\text { Nov } 10 \\ & \text { (2 weeks) } \end{aligned}$ | Coordinate Geometry (Equations of Straight Lines) | 1. Recognize a linear equation connecting two variables <br> 2. Plot a straight-line graph of a given equation, <br> 3. Calculate the gradient of a straight line from its graph or given two points on the line. <br> 4. Recognize the equation and know the gradient for horizontal and vertical lines. <br> 5. Find the y-intercept for any straight line from its graph <br> 6. Recognize the equation of a straight line in the form $y=m x+c$, and use this to state the gradient and the $y$-intercept for any straight line <br> 7. Determine the equation of the line given : <br> - Graph of a line <br> - The coordinates of two points <br> - The gradient and a points <br> 8. Calculate midpoint of a line <br> 9. Use distance formula when given two points to calculate to find the distance between them <br> 10. Identify parallel and perpendicular lines and write their equations. |  |
|  |  |  |  |  |
| 11-12 | Nov 13-24 (2 weeks) | $\begin{aligned} & \text { Construction (with } \\ & \text { ruler \& compasses } \\ & \text { only!) . } \end{aligned}$ | 1. Construct angles $90^{\circ}$ and $60^{\circ}$ <br> 2. Bisect angle; Then use this concept to construct other angles e.g. $15^{\circ}, 30^{\circ}, 45^{\circ}, 75^{\circ}$, $105^{\circ}, 135^{\circ}$ etc. <br> 3. Construct a perpendicular bisector to a line. <br> 4. Construct a perpendicular line to another line from : <br> - Any point on the line segment <br> - A point outside of the line segment <br> 5. Construct circumcircle \& inscribe circle <br> 6. Construct parallel lines <br> 7. Construct quadrilaterals and triangles |  |

| 13 | Nov 27 - Dec 1 | Algebraic Operations | 1. Add, subtract, divide and multiply like terms, Expressions and algebraic fractions <br> 2. Expand $(a+b)$ and $(a-b)$ <br> 3. Solve worded problems involving sum and differences of squares. | Coursework |
| :---: | :---: | :---: | :---: | :---: |
| 14 | Dec 4-8 | SIX WEEKLY TEST |  |  |
| 15 | Dec 11-15 | Algebraic Operations (Cont'd) | 1. Add, subtract, divide and multiply like terms, Expressions and algebraic fractions <br> 2. Expand $(a+b)$ and ( $a-b)$ <br> 3. Solve worded problems involving sum and differences of squares. |  |
