

**Immaculate Conception High School**  
**Digital Media Unit 1**  
**Grade 12 Module 1**  
**September 2021– December 2021**

**ABOUT THE UNIT:**

This unit provides an opportunity for students to develop an appreciation for Digital Media and its impact on society today.

“The Digital Media area of study encompasses all the domains of learning, namely, cognitive, affective and psychomotor. The pedagogy of the subject covers such topics as the theory and history of digital media, the impact of digital media on society, digital media business and entrepreneurial models and elements and principles of digital design and manipulative or practical skills.

In the Caribbean, knowledge and information are increasingly communicated through digital images and electronic media.

The creation and manipulation of digital media serves to disseminate this information and build bridges to understanding the evolving nature of national, regional and international society in the digital era. Digital Media competencies are therefore of great relevance and practical value. This unit should enable students to develop an understanding of computer system hardware and software components including their functions, processes and procedures. In addition this unit will seek to equip students with basic computer skills critical for manipulating the computer as a tool to accomplish tasks such as the creation of text documents and multimedia files.” *(Digital Media Syllabus Rational)*

| Date         | Topic  | Content   | Assessment   |
|--------------|--|---|--|
| Sept 12-16   | <b>Digital Media Terms</b>   | Objectives: <ul style="list-style-type: none"> <li>● Develop an understanding of digital media.</li> <li>● Distinguish among terms relating to digital media.</li> </ul> <ol style="list-style-type: none"> <li>a) Bandwidth, narrowband, broadband.</li> <li>b) Capture, content integration, convergence, compression.</li> <li>c) Digital media, digital rights management, download media.</li> <li>d) Frame, GIF, HDTV, HTML, hypermedia, hypertext, IP, JPEG, linear editing and colour profiles.</li> <li>e) Media, multicasting, new media, pixels, stream, vector graphics, webcast, XML.</li> </ol>                   | Each student/group will be given one of the terms which they will be required to do research on it, then make a 3-minute presentation for the next class. They are to make their presentations using any technological device or method to bring their points across. <i>(e.g., PowerPoint presentation, Audio/Video presentations etc.)</i> |
| Sept 19 - 23 | <b>Evolution of Digital Media</b><br><br><b>SBA/IA</b><br><b>Introduction class and grouping</b> | Objective: <ul style="list-style-type: none"> <li>● Describe the evolution of digital media.</li> </ul> <ol style="list-style-type: none"> <li>a) History and timeline– transition from analog to digital media</li> <li>b) Web 1.0 to current version of the web: (transition from static hyperlinks to interactive web applications and services).</li> <li>c) Emergence of broadband, mobile and social media (smartphones, tablets and other wireless devices, data analysis and applications).</li> <li>d) Affordability and access (impact of increasing Internet access and lower cost of computing devices).</li> </ol> | Students will be placed in groups of three, in which they will be required to create a timeline of the evolution of digital media. They will do a presentation of this evolution using as much technological means as possible. <i>(e.g., PowerPoint presentation, Audio/Video presentations etc.)</i>                                       |
